Kelas : 2KS4

## Praktikum 10 Pemrograman Berbasis Web

---

---

### 1. Membuat aplikasi menggunakan session

- File php10A.php

- File php10B.php

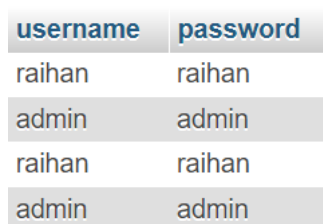

- File php10C.php

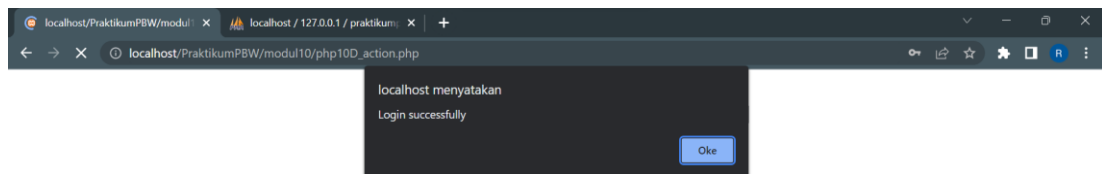

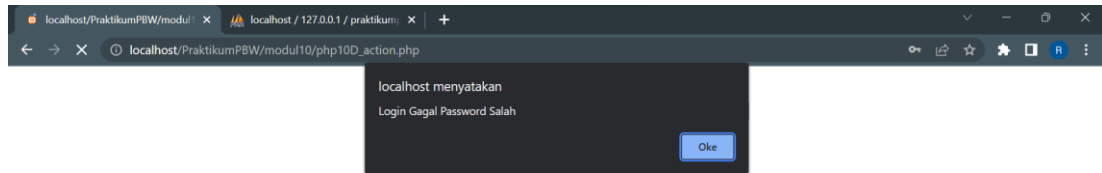

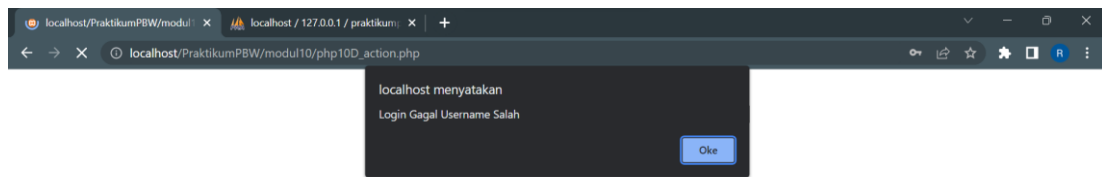

### 2. Membuat Aplikasi Login Menggunakan Session

- File php10D.php

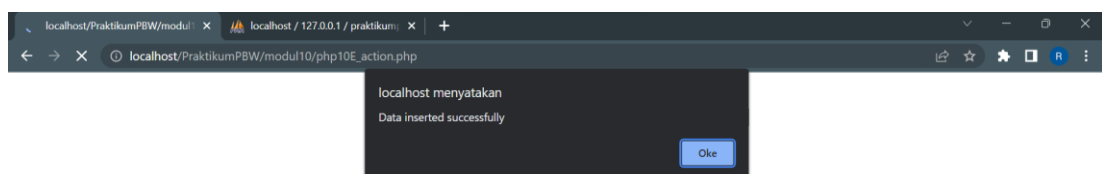

- **File php10D\_action.php**

- **File php10E.php**

- **File php10E\_action.php**

- **File php10F.php**

PHP10F localhost / 127.0.0.1 / praktikum: localhost/PraktikumPBW/modul10/php10F.php

## Data in meeting table

Rows retrieved: 9

Slot	Name	Email	Update
1	Michael North	m.north@foe.stis.ac.id	 
3	Raihan Rahmanda	raihanrahmanda22@gmail.com	 
5	Jody Land	j.land@foe.stis.ac.id	 
7	Trish Shelby	t.shelby@foe.stis.ac.id	 
9	Jihan Maisaroh	jihnmaisaroh@gmail.com	 
15	Mai Saroh	maisawoh15@stis.ac.id	 
17	Saroh	saroh@stis.ac.id	 
18	May	maysaroh@gmail.com	 
20	Ganesha Gibran	ganesgibran@gmail.com	 

- File php10F\_header.php

PHP10F localhost / 127.0.0.1 / praktikum: localhost/PraktikumPBW/modul10/php10F.php

[Data Meeting](#) [Logout](#)

- File php10F\_logout.php

localhost/PraktikumPBW/modul10/php10F\_logout.php

localhost menyatakan  
Logout successfully

- File php10G.php

PHP10G localhost / 127.0.0.1 / praktikum: localhost/PraktikumPBW/modul10/php10G.php?slot=17

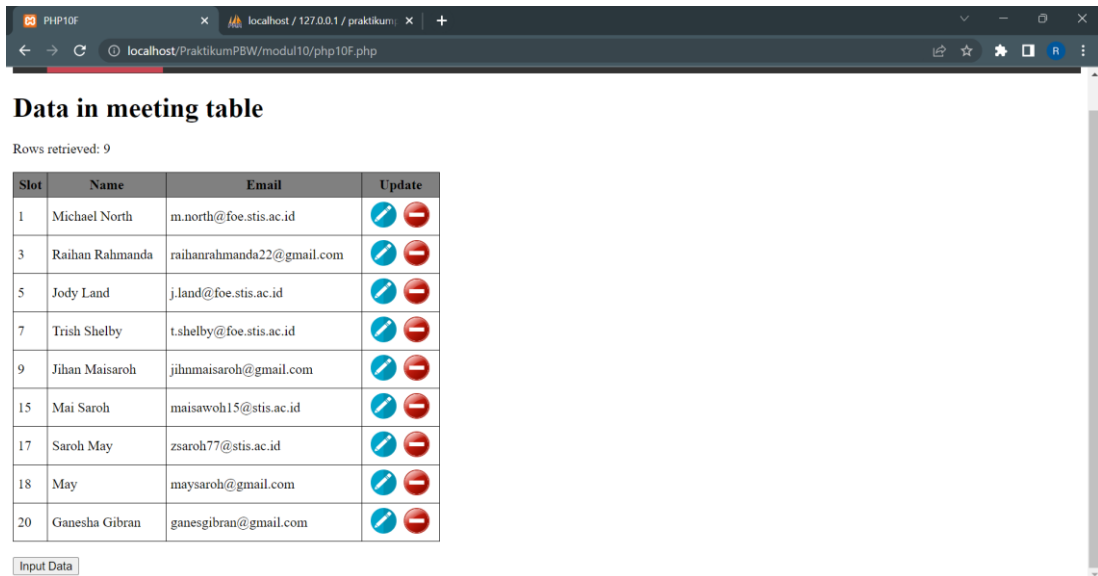

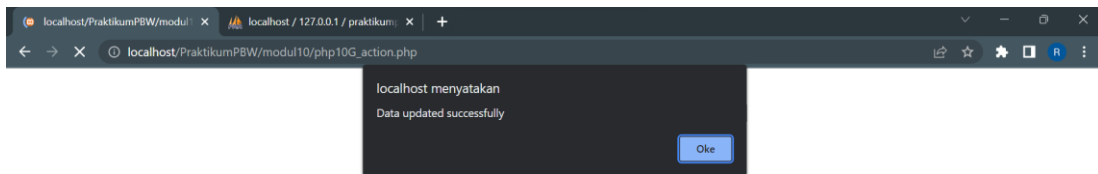

## Update Meeting

Slot:

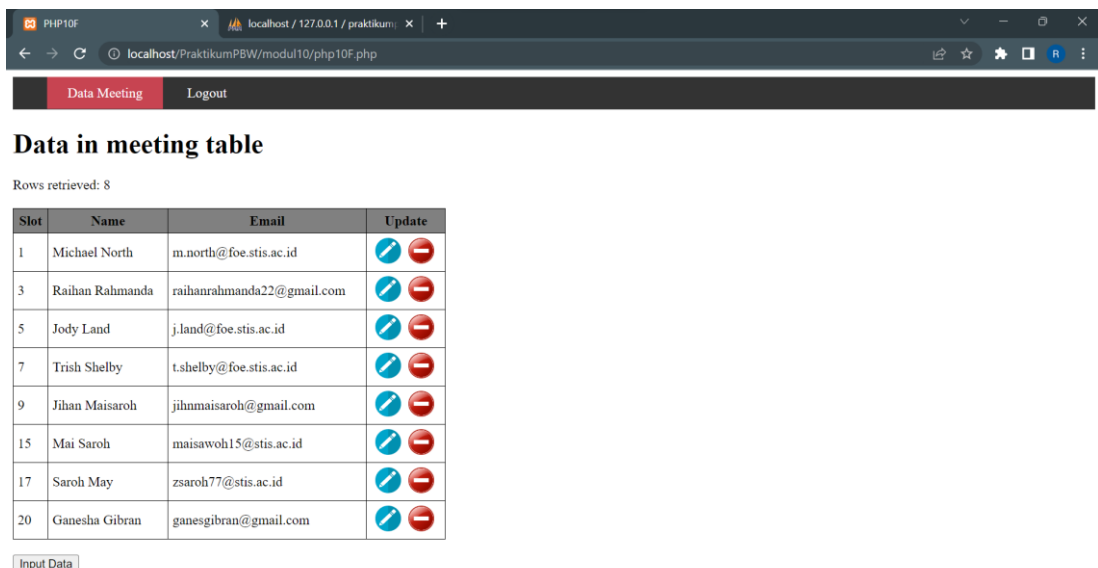

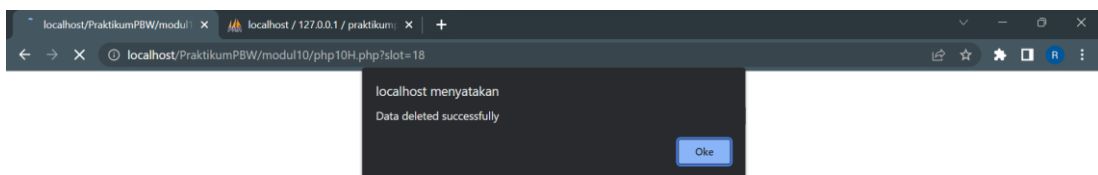

Name:

Email:

- File php10G\_action.php

- **File php10H.php**

### 3. Membuat Aplikasi Menggunakan Session dan Cookie

- **File mylibrary.php**

```

1  <?php
2      session_start();
3
4      function destroy_session_and_data() {
5          session_unset();
6          if (session_id() != "" || isset($_COOKIE[session_name()]))
7              setcookie(session_name(), session_id(),
8                  time()-2592000, '/');
9          session_destroy();
10     }
11
12     function count_requests() {
13         if (!isset($_COOKIE['requests']))
14             $count = 1;
15         else
16             $count = $_COOKIE['requests'] + 1;
17
18         $name = "requests";
19         $value = $count;
20         $expiration = time() + 10; // Cookie will expire in 10 seconds
21         setcookie($name, $value, $expiration);
22
23         return $count;
24     }
25     ?>

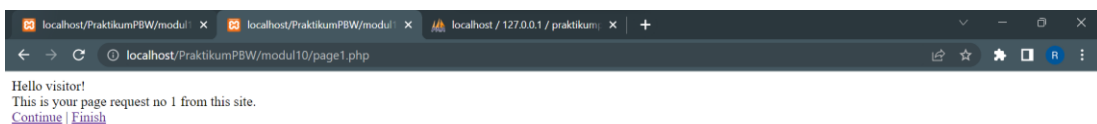

```

Pada mylibrary.php telah ditambahkan pengaturan penyimpanan cookies dengan waktu berlaku 10 detik. Dengan demikian, setelah 10 detik, banyaknya count requests agar tereset ke angka 1.

- **File page1.php**

Setelah waktu berlaku cookies habis

- **File finish.php**

#### 4. Membuat Aplikasi Menggunakan Application Data

- File challenge.php

A screenshot of a web browser window displaying a form titled 'Daftar Antrean'. Below the title, it says 'Anda berada pada antrean ke- 1'. The form has two input fields: 'Nama Lengkap' with the value 'Waihan Wahmanda' and 'Alamat' with the value 'Pekalongan'. A blue 'Submit' button is below the fields. Below the form is a table titled 'Tabel Daftar Antrean' with two columns: 'Nama Lengkap' and 'Alamat'.

Nama Lengkap	Alamat
--------------	--------

A screenshot of a web browser window displaying the same 'Daftar Antrean' form, but now it says 'Anda berada pada antrean ke- 3'. The 'Nama Lengkap' field contains 'James Arthur' and the 'Alamat' field contains 'Sidney'. The 'Submit' button is still present. Below the form, the 'Tabel Daftar Antrean' table now contains two rows of data.

Nama Lengkap	Alamat
Waihan Wahmanda	Pekalongan
James Ryan	Cirebon
